

FaxStream[®]

TestFax[™] Plus

A. TESTFAX PLUS RESULTS:-----

* OVERALL PERFORMANCE	EXCELLENT
* TRANSMISSION LEVEL	EXCELLENT
* TRAINING SIGNAL QUALITY	EXCELLENT
* TRANSMISSION SPEED	EXCELLENT
* FACSIMILE IMAGE TRANSMISSION	EXCELLENT
* FAX ID ERROR	TERMINAL NUMBER MISSING

B. RECOMMENDATION:-----

- * Your facsimile service is READY FOR USE
- * Your facsimile machine ... IDENTITY NEEDS TO BE CHECKED

Transmitting Subscriber Identity format error - use 61 7 31077412

C. ACTUAL TEST RESULTS are:-- * YOUR FACSIMILE LINE NUMBER IS:..... 0731077412

Date/Time received ... 15:27:36 07/07/10	Your facsimile ID	[]
Fax file size, bytes	333674	Call duration, seconds ..	203
Fax image size, total scan lines:	2324	Image resolution:	FINE
Fax image, error free scan lines:	2324	Image, percentage error free:	100.00%
Bits received before image:	488	Bits received after image:	3679
Transmission level: -15.2dBm	EXCELLENT	Error rate:	0 bits/100,000 EXCELLENT
Line noise level: -53.7dBm	GOOD	Sending speed:	14400 bits/sec V.17

TRANSMISSION LEVEL (dBm):-

Did you know that 85% of fax transmission problems are caused by transmission level being set incorrectly? The Transmission level (in section C above) is the calculated signal level arriving at your local exchange. Telstra recommends the fax machine be adjusted for a transmission level of -15.0 to -17.0 dBm as the optimum range. Contact supplier for adjustments.

MOVING YOUR FAX EQUIPMENT TO A DIFFERENT LINE?

Make sure you change your fax machine's ID (TSI) to match the new line number. Test (and adjust if necessary) the transmission level to suit the new line.
